

2019 Health Insurance Premium Rate Review Process Small Employer Group Summary for Rates Effective in 2020

The following table depicts the proposed overall weighted average premium increase, the Essential Health Benefits (EHB) base rate, and the key assumptions behind premium development for the small employer group (SG) market filed by Blue Cross Blue Shield of Rhode Island (BCBSRI), Neighborhood Health Plan of Rhode Island (NHPRI), Tufts Health Plan (Tufts), and UnitedHealthcare (United) as part of the State of Rhode Island Office of the Health Insurance Commissioner's (OHIC) 2019 rate review process (for rates effective in 2020). This information is subject to change as the rate review process continues. Please see our 2019 Rate Review Process Public Comment Solicitation for more information about the rates and this process.

OHIC is currently reviewing these assumptions. This review process will culminate in a final decision by the Health Insurance Commissioner approving, modifying, or rejecting the requested rates. For more information on the rate review process or information about rates filed in the individual or large group markets, please visit <http://www.ohic.ri.gov/ohic-formandraterreview.php>.

There are 51,839 consumers enrolled in small group market plans (data as of March 2019). This represents 25.8% of the fully-insured market (individual, small group, and large group markets).

- The **Overall Weighted Average Rate Increase** represents adjustments to reflect benefit changes in plans.¹ This weighted average rate increase represents the average rate that consumers will experience before changes due to age. The **range of rate changes** represents variation by plan benefits. It does not include the effect of changes in age.
- The **EHB base rate** is used by OHIC to compare premiums across insurers and years and represents the monthly average rate for a hypothetical plan with no cost-sharing for a 21-year old for a given insurer in a given market excluding the cost of pediatric dental. Essential Health Benefits are a set of benefits that must be covered by plans, as called for in the Affordable Care Act.
- The **Medical Expense Trend Assumption** is the annualized rate of increase due to increases in the unit cost of services and in the utilization of services. This includes both medical and pharmacy services. Because rates are generally based on the calendar year 2018 experience adjusted for trend, the expected experience underlying the 2020 rates is projected using two years of medical expense trend.
- The **Non-Medical Portion of Premium** represents the percent of overall premium that is required to cover administrative expense, contribution to reserves and required taxes and fees, including premium tax, ACA fees (which were suspended for 2019 but will be required for 2020) and HealthSource RI Exchange Fees.
- The **Quarterly Effective Date Projection Factor** represents the expected annualized inflation rate for rates charged to small employers renewing at different points during a year. For example, a small employer renewing in January will pay a lower rate than a small employer renewing in December for the same plan because there are fewer months over which they will experience inflation, assuming that the two small employers have a workforce of the same age.
